Before the first use
Operating the tumble dryer

1. Notes on correct laundry care

- Do not operate the tumble dryer if the power cord is damaged.
- Check that all items have been removed from the dryer and the laundry.
- Never put items into the dryer that are not suitable for tumble drying.

Load according to the optimum programme chart.

2. Loading the tumble dryer

- Always load the laundry into the tumble dryer so that the items move freely.
- Make sure that the laundry is not too bulky and that it does not block the fluff filters in the door and in the tumble dryer.

3. Drying

- Use a programme that is suitable for the type of fibre and the care label.
- Ensure sufficient room ventilation.
- Minimum iron items made of cotton, synthetic or mixed fibre, e.g.: tops, dresses, shirts, blouses.

4. Selecting a programme

- Use the programme selector to select the programme.
- Check the programme duration, check/fault indicator lights and programme status.
- The display shows the programme duration, check/fault indicator lights and programme status.

5. Starting the programme

- Press the start button to start the programme.
- The programme is not finished until it shows the end of the programme.
- The indicator light for the programme remains lit up until the original programme is reset.

Changing the programme sequence

- You can change to another programme once the programme has started.
- Programmes cannot be altered.
- Programmes cannot be altered after a programme has started.
- You cannot change to another programme during the programme.

Tips on drying

- Never overload the Drum. Overloading can damage the Drum and the laundry.
- Give a disappointing drying result and cause more creasing.
- Never overload the drum. Overloading can damage the drum and the laundry.

Programme chart

- Use a programme that is suitable for the type of fibre and the care label.
- Ensure sufficient room ventilation.
- Items which only need airing.
- Check seams and stitching to ensure that padding and underwiring are not damaged.
- Sew in or remove underwiring from bras.

- Do not tumble dry
- Use a programme that is suitable for the type of fibre and the care label.
