3. Check for any damage or missing components
4. Install the washing machine according to the installation instructions
5. Connect the washing machine to the electricity supply and ensure that the water and drain connections are secure

Detergent for the pre-wash

Use liquid detergent in the detergent dispenser drawer.

Programming a programme

1. Select the wash programme
2. Touch the programme segment
3. Select the degree of soiling
4. Select the type of capsule you want
5. Touch the sensor for that programme

Loading the washing machine

1. Pull open the door
2. Load the laundry
3. If you are using capsules, insert them into the detergent dispenser drawer

Starting the programme

1. Touch the Start/Stop sensor
2. The programme will start

Care and cleaning

1. Clean the machine
2. The Anti-crease phase and the following will appear under the pictures shows that there are further options to choose from.
3. The orange bar under the pictures shows that there are further options to choose from.
Cleaning and care

Washing at low temperatures and the use of softeners increase the risk of damage to the machine. To prevent hygiene problems, only use low-temperature washing programmes, single wash programmes or programmes with optimised water supply. If necessary, use an Miele hygiene programme.

In order to prevent bacteria and unpleasant odours building up, you should clean the entire drawer at regular intervals (see the operating instructions).

Cleaning the detergent dispenser drawer

Clean the filter (see the operating instructions).

Drain only: Select the programme using the Cold to 40°C sensor.

For heavily soiled garments which are also suitable for washing in the Cold to 60°C programme:

Press down the release button and, at least 2 minutes before reconnecting the washing machine to the mains electricity supply, turn off the tap.

If the preset programme has not been used for a long time. It is possible that the detergent has dried inside the hoses.

Washing at low temperatures and the use of softeners increase the risk of damage to the machine. To prevent hygiene problems, only use low-temperature washing programmes, single wash programmes or programmes with optimised water supply. If necessary, use an Miele hygiene programme.
